About

I'm an indie iOS Developer. I've done Performance Testing for most of my professional career. I'm now looking to switch to a full-time iOS Engineer role.

I started mobile development 4 years ago with the launch of GoT Map Recap. The app averages a 4.8 rating and has been installed 300,000+ times.

I published Locally, a SwiftUI app to manage & navigate to your favourite locations. And Timely, for a better Hacker News reading experience.

I'm now working on Net Worthy. A smart investments portfolio app.

I absolutely love building apps!

Education

2012 - 2014 **Master's Degree: Database Systems and Web Technologies**
@ The University of Bucharest

2007 - 2010 **Bachelor of Business Administration**
@ The British-Romanian University

Professional Experience

past 3+ years **Worldpay by FIS (Bucharest)**
Performance Test Lead

Working with a team of Performance Testers to ensure the performance of Worldpay applications.

Jan '15 - Dec '16
&
May '11 - Jun '14 **Erste Group - BCR (Bucharest)**
Senior Performance Tester

Planned, developed & executed performance tests across all applications developed by BCR. I collaborated with business teams to understand the non-functional requirements.

Jun '14 - Jan '15 **Emitac Enterprise Solutions (Dubai)**
QA Consultant

Test automation and performance testing for clients such as Dubai Smart Government & Fly Emirates.

Skills

SWIFT

Writing Swift part-time for 3+ years and following its evolution since launch, 5 years ago. I've followed RayWenderlich's "*iOS Path*", TeamTreeHouse's "*iOS Tech Degree*", HackingWithSwift's "*#100DaysOfSwift & SwiftUI challenges*", Apple's curriculum "*App Development with Swift*" & numerous other tutorials & books from BuildThatApp, NSHipster & objc.io. So 80+ apps altogether covering UIKit, WebKit, MapKit, CoreImage, SpriteKit, CoreML, SwiftUI & Combine.

PERFORMANCE TESTING

My career has been focused on Performance Testing ever since I first starting working at BCR in May 2011. I've interacted with a large number of teams and technology stacks. I've learned test automation and performance testing and then I've taught others.

DATABASES

I've completed an Oracle Database Design & Programming course in high-school and I have been working with databases ever since both at the office and on my side projects.

WEB DEVELOPMENT

Before taking an interest in mobile development, my hobby projects and learning revolved around full stack web development using mostly PHP and Python.

Other Skills

- Sketch/Illustrator
- UI/UX design
- Software Testing
- Trading/Investing
- Accounting
- emacs

Interests

- Sailing: I am an RYA Day Skipper who loves sailing the Med.
- Avid book reader
- Learning Spanish
- I also enjoy swimming, diving, snowboarding, & table tennis.
